Deepalpur to San Francisco Ved Prakash Gupta 2020-09-08 The book is about a village boy, who got rearing under the patronage of God-fearing mother and disciplinarian father, who was running a grocery shop in the nearby town. Struggling with the least facilities in the village and later in the nearby town, the boy could become lecturer in a degree college. Though he lost his job, the young boy was determined not to give up and succeeded in getting job in NCERT- The National level body. The book has many interesting innovations in education that are discussed including a chapter on the infamous Bhopal Gas tragedy of 1984. Later, the young teacher got an invitation from Manchester University for joining the course on EPPAM, thus initiating exposure to culture and functioning of a developed country. Thus adding anecdotes from U.K. Paris, New York, Sydney, Gold Coast, Auckland, and San Francisco, the autobiography also explores the Covid- 19 pandemic, and proposes meditation as conceived during Kriya Yoga.

Monthly Statistical Commentary on Indian Economic Conditions 1961

Low Carbon Pathways for Growth in India Rajat Kathuria 2018-08-01 This book explores ways in which India can negotiate the low carbon path up until 2030, when it is expected to be the largest economy after the US and China. It comprehensively reviews the low climate pathways for India and provides a guide to the pathways that the country can adopt. India's population, energy demands and emissions will increase significantly, and the challenge is to restrict its CO2 emissions and walk the low carbon path.

Through its Intended Nationally Determined Contributions (INDCs), India has pledged to reduce its emissions significantly. Addressing the question of which low carbon paths India can adhere to without compromising its growth, the book identifies the key factors that feed into existing models of climate change and discusses the cost of action versus inaction. It also examines key issues concerning India's environment through the lens of the transport, industry and water sectors. The book concludes by looking at policy implications for low carbon growth in India.
